**FOR IMMEDIATE RELEASE**

## **LIBERTY BELL MOTORSPORTS PARK CHOOSES BERKS COUNTY ARCHITECTS**

David M. Kleckner, Architects, PC, of Shillington PA has been awarded the architectural contract for all buildings at the Liberty Bell Motorsports Park and Campground. "This is a unique opportunity for our firm" said David Kleckner. "I'm looking forward to working with Lou and his team to create an exciting race and camp environment. Our goal is to design buildings which compliment the setting while at the same time give a sense of excitement appropriate for the racing venue."

The future racetrack will consist of racetrack and campground buildings. Track buildings include timing and scoring buildings and garage space for storage as well as race day use. There will also be space for administration, dining, snack bars, medical facilities and a pro shop. Liberty Bell Motorsports Park will be a multi-functional, state of the art motorsports complex situated on 653 scenic acres just off Route 422 near Douglassville in Berks County, Pennsylvania. The park is being designed to preserve the rural integrity of the property, which presently includes many wooded areas along with crop farming. The park will consist of 4 different racing circuits - two 26-foot wide tracks that are approximately 0.5 mile in length can be operated independent of each

other or operate as a 0.84-mile road course. Both are served by their own pit/paddock areas and are designed for Karting, SuperMoto, MiniMoto and MiniGP to name a few. The two 40 foot wide, 1.5 mile courses can be operated independently of each other or combined to form a world class road course totaling 3.27 miles in length. All courses were designed with minimal concrete barriers; instead, incorporate massive run-off areas, many larger than football fields. The absence of tunnels or bridges minimizes the damages encountered by these structures. This modern technology ensures being able to safely compete in events while greatly minimizing the chances for driver injury or damage to equipment. A membership club, full service campground, and 30,000 square foot "Liberty Center" that will house concessions, emergency services, meeting rooms and a complete Pro Shop will be part of the plan to insure Liberty Bell is the most complete and user-friendly facility of its kind in the Mid-Atlantic region. The Campground buildings will include a general building for administration, retail, laundry, game room and restrooms. There will also be two freestanding bathhouses located throughout the site.

"I am proud to have selected David M. Kleckner Architects as our architectural firm for the Liberty Bell Motorsports Park project", said Lou Mascaro, owner of Liberty Bell. "Dave and his team bring a unique and inspired approach to their designing that made them an easy choice for Liberty Bell. Plus, Dave and his firm are located right here in Berks county, which furthers my commitment to making Liberty Bell a project that will benefit all of Berks. My team and I look forward to working with Dave as we develop Liberty Bell into the most state of the art motorsports facility in our region." Construction is planned to begin in 2011.
